Inauguration of NSS special camp at pulladigunta village.

### **Description of the activity:**

The NSS volunteers have organized the clean & green programme to explain/to create awareness among the villagers about the using cleaning methods and products with environmentally friendly ingredients and procedures. It is necessary to keep our environment clean because we get fresh air to reduce pollution.

### **OBJECTIVE:**

- Care and share the nature.
- To generate awareness among the masses and policy makers for saving the environment.

### **OUTCOME:**

- Villagers know about the importance of clean and green.
- By implementing green, cleaning programmes to reduce surface damage.

Clean and green by NSS students at pulladigunta village.

### **Description of the activity:**

NSS volunteers have organized the plantation program. In this program NSS volunteers planted saplings in various places in the villages. It has a great impact on environment by reducing incidences of global warming. The plantations needed because trees contribute to their environment by providing oxygen, improving air quality, conserving water, preserving soil and supporting wild life. So NSS volunteers planted sapling in various places in village to create awareness about the need of trees.

### **OBJECTIVE:**

- The main objective of the plantation is maintaining the balance in nature.
- To make aware the villagers about the plantation and its importance.

### **OUTCOME:**

- Importance of planting plants.

- Importance of nature balance.
- Villagers know about the plantation techniques.

Planting of plants by NSS students at pulladigunta village.

### **Description of the activity:**

The NSS volunteers have organized the medical camp in the concept of blood grouping. In this concept of blood grouping to create the awareness among the villagers to save the person who is in emergency by knowing the blood group.

### **OBJECTIVE:**

- Villagers get to know their blood group which in turn helps them in any type of emergencies.
- To save themselves they know about their blood group.

### **OUTCOME:**

- Villagers have identified their blood group.
- It will be useful in future.

Blood groups of various peoples.

### **Description of the activity:**

The NSS volunteers have organized the awareness programme about the corona virus in the mind of the villagers so that we can say that precautions no to spread of corona virus, and we made the villagers how to prevent themselves from corona.

### **OBJECTIVE:**
