CELEBRATION AND OBSERVATION OF IMPORTANT DAYS

ACADEMIC YEAR 2020-21

Dept. of Zoology

Name of the Activity	Celebration of International Yoga Day on 21.06.2021
Objective	The main objective behind the celebration of Yoga Day is to make the ancient practice (Yoga) popular among the present generation of people who are unaware of its benefits. Adopting this practice is believed to provide significant relief from physical ailments and mental tension which plagues our day to day life. Regular practice will strengthen the muscles of our arms, back, legs, and core.
Date	21.06.2021
Time	6.00-8.00pm
Participants	Students, staff and resource person
No.of students	40
No.of faculty	10
Other participants	Dr. K.Kondaiah, rtd. Lecturer in zoology and master trainer in yoga
Description in brief	Dr. K. Kondaiah explained the importance of yoga in present day life, demonstrated various simple yogasanas and breathing exercises to which are useful release the stress and for maintain ing healthy life.
Outcome:	<ol style="list-style-type: none"> 1. The students were able to know the importance of yoga day 2. They were able to perform simple yogasanas and breathing exercises.

Department of Home science

National nutrition Week Celebration 2020-2021

Introduction:

In India the national nutrition week is observed every year from September 1 to 7th to raise public awareness about nutrition and healthy eating habits. This week is observed to make people understand the importance of nutritional and adaptive eating habits so that they can maintain a healthy life style.

During national nutrition week, the government takes up various initiatives to spread awareness about the right nutrition. A healthy mind resides in a healthy body and for that, we must take the adequate amount of nutrients such as proteins and vitamins in our daily diet. Every year this day will be celebrated with theme and this year i.e. 2021 theme is ‘‘ FEEDING SMART RIGHT FROM START’’.

Procedure:

The department of Home science organized an extension activity on the occasion of national nutrition week at Tulasi Multi Speciality Hospital, kothapet, Guntur. In this event patients, clients and doctors are participated and the total participants were 50. In this occasion we planned to display a day's menu for pregnant mothers and for 6 months babies diet as per this year theme i.e. ‘‘Feeding smart right from start’’ because they are base for upcoming generations. The students of home science explained clearly about importance of nutrition and their role in above two phases by showing planned menu, food pyramid and other Audio visual aid.

Brief Report

Objectives	<ul style="list-style-type: none"> To create awareness on nutrition and their needs. To educate pregnant women and lactating mothers on importance of weaning mixes.

WORLD BREAST CANCER AWARENESS

MONTH October 2020

Early Detection Can Help Save Lives

QUIZ BY

**Department of Biochemistry
Govt. College for Women(A)
Guntur, Andhra Pradesh**

Introduction: On the occasion of October as breast cancer awareness month, Department of Biochemistry, Government College for Women (Autonomous), Guntur, has organized the virtual quiz. In the spirit of raising awareness, we brought this virtual quiz to the students and faculty all through the nation. The students and faculty became part of the awareness by attempting the quiz. The virtual quiz was held by Google forms.

Objective: To provide awareness on the breast cancer the department has chosen the virtual quiz as the choice to provide awareness. This provides every woman has access to education, screening, treatment, support and hope.

Students and families will get awareness on breast cancer and as they love their life can enrich their diet, go for early diagnosis if any symptoms appear and can have a better treatment as it was age related and not gender biased.

Details: To provide awareness on the breast cancer, the department has chosen the ‘World Breast Cancer Awareness Month – October’ as the platform. So the department has utilized google forms to give awareness on it.

World Breast Cancer Awareness Month is observed annually on October for raising global awareness of the prevention, diagnosis and treatment of breast cancer. As per the current scenario the quiz was conducted virtual by google form platform.

The faculty of the department have encouraged all so as it'll help the students to understand the severity of the condition all facing. As it was not gender, race biased etc; all should gain the knowledge regarding it and have to take necessary precautions to avoid as a family and friends.

“Early Detection Can Help Save Lives” is the theme for this year 2020.

Early detection and treatment as well as palliative care of this disease is most required. Breast cancer is by far the most common cancer in women worldwide, both in the developed and developing countries. In low- and middle-income countries the disease has been rising steadily in the last years due to increase in life expectancy, urbanization and adoption of western lifestyles.

Currently there is not enough knowledge on the causes of breast cancer, therefore, early detection of the disease remains the cornerstone of breast cancer control. When breast cancer is detected early, and if adequate diagnosis and treatment are available, there is a good chance that breast cancer can be cured. If detected late, however, curative treatment is

often no longer an option. In such cases, palliative care to relief the suffering of patients and their families is needed.

The breast must be regularly checked, as after reaching a certain age, getting good advice from the doctors etc were mandatory for every women and recent studies has shown that even men were now prone to breast cancer.

Outcome: 200 participants has attempted the virtual quiz, this shows that most of the citizens has been aware of breast cancer; as this being one of the major type of cancer worldwide especially in women. For every disease 'prevention is better than cure'. Certificates were distributed to all the participants who attempted the virtual quiz.

Theme: "I can, we can"

7th November 2020

**Presentations by Biochemistry
Students**

on

**NATIONAL CANCER
AWARENESS DAY**

**Govt. College for Women(A)
Guntur, Andhra Pradesh**

Introduction: On the occasion of National Cancer Awareness Day, Department of Biochemistry, Government College for Women(Autonomous), Guntur, has organized the presentations by biochemistry students to give awareness to their classmates. The presentations were held by Google meet. Four students have presented on the causes, risk factors, prevention and treatment of various types of cancer.

Objective: To provide awareness on the cancer, the department has chosen the 'National Cancer Awareness Day' as the platform. So the department suggested few students to give presentations so that other students and families will get awareness on cancer.

November 7th was considered as a **National cancer awareness Day in India to educate people about cancer, its treatment, and its**

symptoms. According to the World Health Organization (WHO), cancer is the second leading cause of death globally. In 2018, there were around 0.8 million cancer deaths in India against 9.5 million globally. By 2040, the number of new cases is estimated to be double in India.

Details: National cancer awareness Day is observed annually on November 7th to raise national awareness of the prevention, diagnosis and treatment of cancer and various types. It was launched by the Union Health Minister Dr. Harsh Vardhan in September 2014. Therefore in 2014, the day was celebrated for the first time and focuses on the early detection and cure of cancer.

According to the Lancet report about cancer, India is the second biggest killer after heart disease. India is likely to have over 17.3 lakh new cases of cancer and over 8.8 lakh deaths due to the disease by 2020 with cancers of breast, lung, and cervix topping the list

The faculty of the department have encouraged the presenters for preparing and delivering the presentation, so as it'll help the students to understand the severity of the condition all facing. As it was not gender, race biased etc; all have to gain the knowledge regarding it and have to take necessary precautions to avoid as a family and friends. '*P. Sravani, Suma Swarajya Lakshmi, Venusri* of third BSc and *Swaroopa* of second BSc' gave the presentations and focused on the content.

The theme for this year was '*I Can, We Can*' Based on the theme all the presenters has focused on various types of cancer that are common in India. P. Sravani focused on Leukemia, Suma swarajya Lakshmi on Lymphoma, Venusri and Swaroopa on breast cancer. All focused on the national level.

Symptoms of Cancer

It has been seen that usually, cancer has no specific symptoms. Therefore, people should undergo appropriate cancer screening on time. Also, early detection of cancer has made several cancers treatable.

Symptoms of common cancer in general are:

Habits of bowel changed, for example, continuous diarrhoea, Consistent cough or blood in saliva represents simple infections like bronchitis, Unexplained anaemia (low blood count) may also result in the deadly disease, Breast lumps, Urination change, Lumps in testicles, Blood in the stool.

Various types of cancer treatment

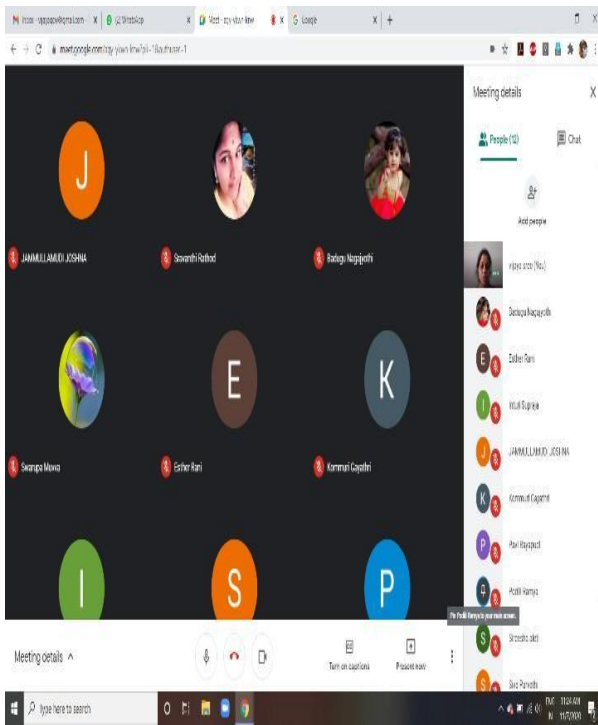

Immunotherapy, Chemotherapy, Radiation Therapy, Hormone Therapy, Targeted Therapy, Stem Cell Transplant, Surgery, Precision Medicine etc. How can be cancer prevented?

Early detection and prevention is must to cure Cancer disease.

Healthy weight, Healthy diet, Physically active, Get vaccinated, Sun Protection, Don't use tobacco, Regular check-ups etc.

Therefore, National Cancer Awareness Day highlights the cancer disease across the country to reduce the risk of cancer and to provide knowledge on how to tackle this disease and what are the probable symptoms that should not be neglected. World Cancer Day is also celebrated on 4 February annually to raise awareness about cancer globally.

As per the current scenario the presentations were done online by google meet platform. Second and third year students of biochemistry were the target audience.

TYPES OF LUKEMIA

- The four most common types of leukemia are acute lymphocytic leukemia, chronic lymphocytic leukemia, **acute myeloid leukemia**, and **chronic myeloid leukemia**.
- Acute lymphocytic leukemia (ALL**, also known as acute lymphoblastic leukemia) is the most common type of leukemia in children, but it can also affect adults. In this type of leukemia, immature lymphoid cells grow rapidly in the blood. It affects almost 6,000 people per year in the U.S.
- Acute myeloid leukemia (AML**, also called **acute myelogenous leukemia**) involves the rapid growth of myeloid cells. It occurs in both adults and children and affects about 19,500 people each year in the U.S.

1. Mobilise stem cells using growth factor and chemotherapy

2. Stem cells collected from peripheral blood

3. Stem cells frozen until required

4. Conditioning chemotherapy to suppress immune system

5. Stem cells thawed and re-infused

6. Support with blood products and antibiotics (approximately 2 weeks)

7. Further follow-up as outpatient for 2-3 months with regular blood tests and medication

BREAST CANCER KILLS MEN, TOO.

Risk factors for male breast cancer

- Testicular abnormalities (cryptorchidism, orchidopexy, torsion, orchitis, testis trauma)
- Hormonal abnormalities (hypertrophy, gynecomastia, diabetes, cirrhosis and heavy alcohol intake)
- Familial history of breast cancer, mutations in BRCA1, CHEK2, PTEN
- Benign breast lesions (Nipple discharge, breast cysts, breast trauma)
- Exposure to radiation or high temperatures
- Old age
- Smoking (current)

- Less than 1% of all new breast cancer cases occur in men.
- Men with a BRCA1 mutation have a 1% risk of developing breast cancer by age 70; BRCA2 mutations confer a 6% risk.
- Breast cancer progresses, even in stage I cases, is worse in men than in women.
- Treatment for male breast cancer has usually been a mastectomy, which may be followed by radiation, hormone therapy (such as with tamoxifen), or chemotherapy.

World Pneumonia Day

College Level Quiz

12th Nov 2020

Healthy Lungs for All

Department of Biochemistry,
Government College for Women (A),
Guntur, Andhra Pradesh.

Introduction: On the occasion of World Pneumonia Day, Department of Biochemistry, Government College for Women (Autonomous), Guntur, has organized the virtual quiz at college level. In the spirit of raising awareness, we brought this virtual quiz to the students of our college. The students became part of the awareness by attempting the quiz. The virtual quiz was held by Google forms.

Objective: Pneumonia was the world most disease among children and adults which cause maximum death rate - claiming the lives of 2.5 million, including 672,000 children, in 2019. As it was the respiration related disease and as per the current scenario COVID-19 which was again respiratory disease which enhance the effect ratio dramatically. So to provide awareness on the Pneumonia that too in this pandemic situation, the department has chosen the virtual quiz on ‘World

Pneumonia Day’ as the choice to provide awareness. This provides to educate, screening, treatment, support and hope.

Students and families will get awareness on pneumonia and as they love their children can enrich their care and attention and will go for early diagnosis if any symptoms appear and can have a better treatment as it was age related and not gender biased.

Details: To provide awareness on the pneumonia, the department has chosen the ‘World Pneumonia Day’ as the platform. So the department has utilized google forms to give awareness on it.

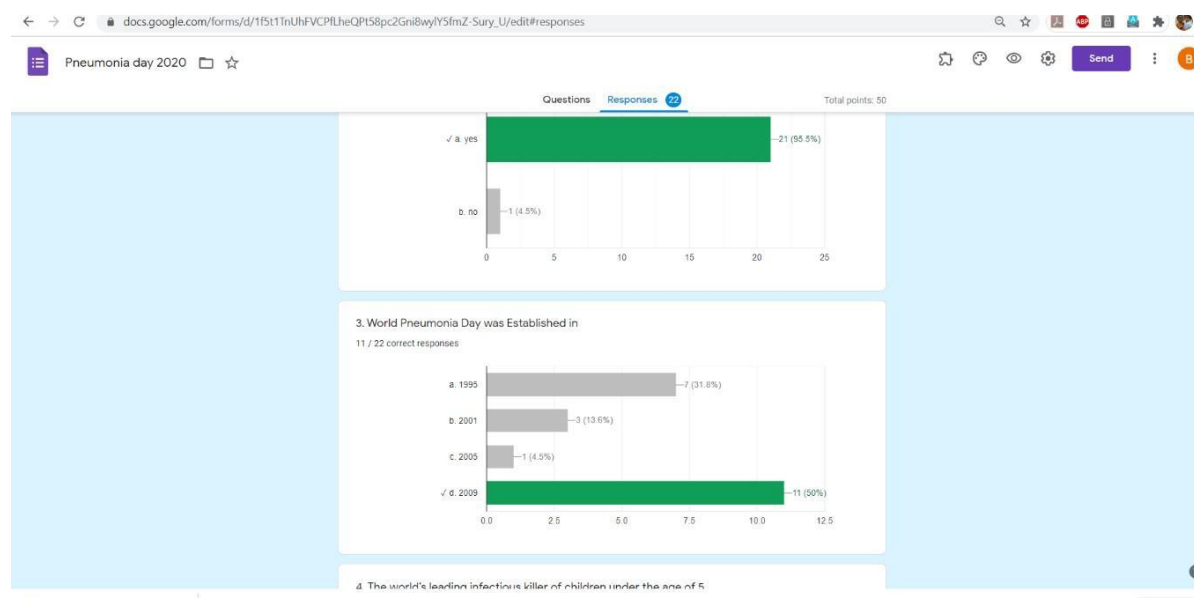

World Pneumonia Day is observed annually on November 12th for raising global awareness of the prevention, diagnosis and treatment. As per the current scenario the quiz was conducted virtually by google form platform.

The faculty of the department have encouraged all so as it’ll help the students to understand the severity of the condition all facing. As it was not gender, race biased etc; all should gain the knowledge regarding it and have to take necessary precautions to avoid as a family and friends.

‘Healthy lungs for All’ is the theme for this year 2020.

COVID-19 could add 1.9 million to the death toll this year. **Hence the theme for this year suits aptly. And <https://stopppneumonia.org> ‘every breath counts’ suggests WORLD PNEUMONIA DAY – LET’S INCREASE ACCESS TO MEDICAL OXYGEN.** As COVID patients require more oxygen for their survival.

The screenshot shows a Google Forms interface for a quiz titled "College Level Virtual Quiz". At the top, there is a banner for "world pneumonia day" with a logo of two lungs. Below the banner, the quiz is identified as "Section 1 of 2". The form contains two input fields: "Email address" with a validation message "Valid email address" and a note "This form is collecting email addresses. Change settings", and "Name(As per certificates)" with a "Short answer text" label.

Early detection and treatment as well as palliative care of this disease is most required. Pneumonia is by far the most common disease in children worldwide, both in the developed and developing countries. In low and

middle income countries the disease has been rising steadily in the last years.

Outcome: 22 participants has attempted the virtual quiz from our college. This shows that most of the students were not aware of the disease; so it indicates our responsibility to provide awareness in all aspects to eradicate it completely. Certificates were distributed to all the participants who attempted the virtual quiz.

Diabetes Education for Middle Level Extension Functionaries

Dept. of Microbiology

Name of the Activity: Observation of Global Antibiotic awareness week

Objective:	To create awareness among the students and staff about antibiotic resistance.
Date :	18-11-21 to 24-11-21
Time :	Every day from 4 50 5 pm
Participants:	Students
No.of students	120
No.of faculty	3
Other participants	
Description in brief:	In view of “Global Antibiotic awareness week” students of microbiology department has displayed the charts, power point presentations and explained the students about the causes of antibiotic resistance , consequences of over usage of antibiotics ,prevention of antibiotic resistance etc.
Outcome:	Almost 120 students have learned the concept of antibiotic resistance with enthusiasm, they have interacted with the staff and students of microbiology and clarified their doubts.
Evidence:	

**National Pollution Control
Day**

The Bhopal Gas Tragedy happened on the 2nd December, 1984. ‘National Pollution Control Day’ is observed every year on this day to remind people of the disastrous effects of industrial pollution and the need for pollution control. The Department of Chemistry observed the ‘National Pollution Control Day’ by conducting an essay writing competition on ‘How to Control Pollution’. A meeting was organized and prizes were distributed to the winners of the competition.

GOVT.COLLEGE FOR WOMEN, GUNTUR

DEPARTMENT OF CHEMISTRY,

WORLD EARTH DAY 22nd April 2021.

Objective: To create awareness about the role of individual in preserving energy resources and to reduce pollution on earth.

Need of the hour and context: Earth is the only planet for us to live. We make use of different natural resources like water, coal, petroleum, soil, plants and animals for our development. But some of the resources are non- renewable, so we have to make use of them diligently. If resources are carelessly managed, many will be used up. If used wisely and efficiently, however, renewable resources will last much longer. The theme of the world Earth Day 2021 is "Restore the Earth". Through conservation, people can reduce waste and manage natural resources wisely. Development and conservation can coexist in harmony. When we use the environment in ways that ensure we have resources for the future, it is called sustainable development.

Activity: An awareness programme was conducted on 22nd April 2021 from 3-4pm in the seminar hall. As a part of this programme our principal madam and other staff members planted saplings in the campus as they are key producers of oxygen and carbon dioxide sinks. In this event our students presented the ways to reduce pollution and to conserve energy resources by in the form of a song. Students and staff shared their views about the ways to conserve electricity, water and how to minimize plastic wastes. 10 teaching and 40 students were attended this program.

Evidence of success: By this programme participants got awareness about the need to conserve energy resources and to adopt ways to reduce plastic usage and can help for the sustainable development.

Departmental Activity

Ozone Day

Objectives: In order to conduct awareness programme to motivate the students towards green activities like plantation and avoid the usage of plastic.

Need addressed and the Context: World Ozone Day 2021- It is also known as International Day for the Preservation of the Ozone Layer. The ozone layer is a shield of gas that protects the Earth from the harmful rays of the Sun and helps in preserving life on the planet. To spread awareness among people about the depletion of ozone layer to control total global production and consumption of substances, which are causing depletion of ozone layer. Ultimate objective of their elimination on the basis of developments in scientific knowledge. Ozone layer protects the earth from harmful UV rays of sun .

The Practice: Students are participated in plantation programme on this Ozone day awareness programme.

Number of students participated:40

Theme of World Ozone day 2020 :

Govt. College for Women
(AUTONOMOUS) GUNTUR, 1962 (1962)
College with Potential for Excellence

World Ozone Day 2020
16th Sep 2020
35 years of global ozone layer protection
Theme: "Ozone for life"

In a move to inculcate a sense of responsibility, encourage young minds to protect the ozone layer and consider remedial measures to conserve environment, Chemistry Department of Government College for Women (A), Guntur conducting "GCW GREEN DAY" by planting a sapling and arrest depletion of ozone layer" on the occasion of "International Day for the Preservation of the Ozone Layer" to be observed as "World Ozone Day" on September 16, 2020.

All the interested students (in college uniform) and Faculty of GCW can participate in this event by sending a photo of sapling to ozoneday2020chemgcw@gmail.com and those will be used to make a Photo Album.

"If you spare 10 minutes to plant a sapling and ensure its growth, it takes generations round the clock."

Post your activity on social media to create awareness about World Ozone Day 2020.

Evidence of Success:The response to this event was very good.As it displayed in different areas of near by places in this plantation programme.

Outcomes:In this awareness programme students were learned about the importance of plantation and Green house effect.

Name of the Activity	Awareness programme on HIV on the occasion of AIDS Day
Objective	To create awareness about the symptoms, causes and preventives of the pandemic disease HIV/AIDS that has taken unprecedented number of lives. To create awareness among the students to unite and fight against AIDS To show support for people living with AIDS
Date	01.12.2020
Time	11.00am -1.00pm
Participants	Students, faculty and resource persons
No.of students	70
No.of faculty	13
Other participants	Dr. G. Snigdha
Description in brief	Dr. G. Snigdha created awareness on the 2021 AIDs day theme <i>i.e.,</i> <u>End inequalities. End AIDS. End pandemics</u> , Principal of the college Dr. V. R. Jyotsna Kumari, Dr.

	Hanumantha Raju, RRC District Co-ordinator, NCC Co-ordinators of the college addressed the students
Outcome:	Students got the information on various routes of transmission of HIV Got the information on ART centres available in Guntur Dist.

Department of Botany

Objective:	AIDS DAY
Date :	1-12-2021
Time :	4 pm to 5 pm
Participants:	Students and faculty of Botany Dept
No.of students	30
No.of faculty	7
Other participants	2
Description in brief:	World AIDS Day is celebrated on December 1 every year since 1988. It is dedicated to raise awareness, educate and improve the understanding of HIV as a global public health problem. It provides an opportunity to understand the interdependence between progress in acquired immunodeficiency syndrome (AIDS) and progress towards Universal Health Coverage and the right to health.

The theme for World AIDS Day 2021 is “**End inequalities. End AIDS. End Pandemics**”.

The day focuses on the increasing inequalities & inequities in access to the healthcare services for HIV due to Covid-19. This is a call for all to reach the people who are currently not receiving the AIDS related services to make lives of people living with HIV less challenging.

According to WHO, in 2020,

- 37.7 million people living with HIV have been reported in 2020
- HIV caused around 1 million deaths, globally
- 1.5 million new cases were detected in 2020

The new target set by UNAIDS, 95-95-95, will need to redouble efforts to decrease the numbers of HIV infections due to healthcare disruptions and to increase the public health response to HIV.

What is HIV/AIDS

Infection caused by the Human Immunodeficiency Virus (HIV) in the human body results into weakening of people’s immune system (defense system) against infections and some types of cancer. This immunodeficiency results in increased susceptibility to a wide range of infections, cancers and other diseases that people with healthy immune systems can fight off.

The most advanced stage of HIV infection is called as acquired immunodeficiency syndrome (AIDS). It is defined by the occurrence of any of more than 20 opportunistic infections or HIV-related cancers.

Signs and symptoms:

- The symptoms of HIV vary depending on the stage of infection. The first few weeks after initial infection, individuals may experience no symptoms or an influenza-like illness including fever, headache, rash, or sore throat.
- As the infection progresses, an individual can develop other signs and symptoms, such as swollen lymph nodes, weight loss, fever, diarrhoea and cough.
- Without treatment, they could develop severe illnesses such as tuberculosis, meningitis, severe bacterial infections and cancers.

How is HIV transmitted

- **Sexual Contact:** The most frequent mode of transmission of HIV is through sexual contact with an infected person.
- **Sharing needles or syringes:** HIV can be transmitted through needles and syringes contaminated with HIV infected blood.
- **Receiving blood transfusions,** blood products, or organ/tissue transplants that are contaminated with HIV can result into HIV infection.

- **From mother to child:** A pregnant woman infected with HIV can transmit the virus to child during pregnancy, birth, or breastfeeding.

High Risk groups (HRGs)- Female sex workers (FSW), men who have sex with men (MSM), transgender (TG) and injecting drug users (IDUs) belong to high-risk groups.

Bridge Populations- Individuals who have sexual partners in the high-risk groups as well as other partners of lower risk (general population) are called a “bridge population” because they form a transmission bridge from the HRGs to the general population. Truckers and Migrant workers are named as bridge population due to their close proximity with high-risk groups and are at the risk of contracting HIV.

HIV is not transmitted:

- By hugging, shaking hands, sharing toilets, sharing dishes, or closed-mouth or “social” kissing with someone who is HIV-positive.
- By mosquitoes, ticks or other blood-sucking insects.

Prevention and control of HIV/AIDS:

National Aids Control Programme (NACP) is a 100% centrally sponsored scheme by the Ministry of Health and Family Welfare, Government of India. The programme is being implemented through the State AIDS Control Societies (SACS) and District AIDS Prevention and Control Units (DAPCUs) in the country to reduce new infections by 50% (2007 Baseline of NACP III) and to provide comprehensive care, support and treatment to all persons living with HIV/AIDS.

Even though the prevalence of HIV is decreasing over the last decade, following activities under the NACP would provide essential support in arresting new infections and thereby achieving the target of "Ending the epidemic by 2030" for Sustainable Development Goals.

- Human Immunodeficiency Virus (HIV) and Acquired Immune Deficiency Disease (AIDS) Prevention and Control Bill to ensure equal rights to the people infected with HIV and AIDS in getting treatment and prevent discrimination of any kind.
- ‘Test and Treat Policy’ for HIV with the objective of “as soon as a person is tested and found to be positive, he will be provided with ART irrespective of his CD count or clinical stage.”
- The life-saving third- line ART treatment for HIV patients free of cost
- 95-95-95 by 2024: To identify 95% of people living with HIV, place 95% of people identified as living with HIV on treatment and ensure that 95% of people on treatment have sustained viral load suppression by 2024.

Red Ribbon Express- It travels across the country through a specified route chart to spread awareness on HIV/AIDS, promote safe behavioral practices, strengthen people's knowledge about the measures to be taken to prevent this

	<p>epidemic and develop an understanding about the disease to reduce stigma and discrimination against People Living with HIV/AIDS.</p> <p>Keyways to prevent HIV transmission</p> <ul style="list-style-type: none"> ● Practice safe sexual behaviors such as condoms ● Get tested and treated for sexually transmitted diseases. ● Never share needles or other injecting equipment, including syringes, spoons and swabs (injecting drug users). ● All pregnant women should be tested for HIV as a part of routine antenatal screening, and start HIV treatment immediately if found positive for HIV. ● Post-exposure prophylaxis (PEP): It is the short-term antiretroviral treatment to reduce the likelihood of HIV infection after potential exposure, either occupationally or through sexual intercourse. ● Pre-exposure prophylaxis is advised to those people who do not have HIV but are at very high risk of getting HIV to prevent HIV infection by taking medicine.
<p>Outcome:</p>	<p>Created awareness about viral diseases. Developed health consciousness among the students. Equitable access to medicines, vaccines and health technologies. Human rights, to build trust and tackle pandemics. Elevating essential workers, and providing them with the resources and tools they need. People-centred data systems that highlight inequalities are being brought to the notice of the students. Every minute that passes, we are losing a precious life to AIDS. We don't have time.</p> <p>End inequalities. End AIDS. End pandemics</p>

Dept. of Botany

Objective:	POLLUTION DAY
Date :	3-12-2021
Time :	4 pm to 5 pm
Participants:	Students and faculty of Botany Dept
No.of students	25
No.of faculty	7
Other participants	2

<p>Description in brief:</p>	<p>World Pollution Prevention Day is observed around the globe on December 2. With eye-opening movements like ‘Fridays for Future’ taking charge, the world today doesn’t need many reminders to realize the consequences of climate change. However, it’s important to note that each individual has a huge role in this fight against pollution. A clean environment cannot be achieved with the efforts of a selected few. Small acts such as planting a sapling, dumping garbage at the right place, recycling plastic items, etc., are the first steps to turning our planet into a sustainable place to live. So, start today!</p> <p>This day is created to instill awareness on environmental pollution and its negative impacts on our health and the planet. The most hazardous type of pollution that has taken the world by storm is plastic pollution. From degrading soil quality to killing marine life, plastic pollution will soon become a bane to our existence.</p> <p>International organizations such as the United Nations (U.N.), the World Health Organization (WHO), Greenpeace, and others have been urging countries all over the globe to take precautionary measures to control pollution. However, the responsibility does not lie only on our governments; individuals must come forth to make every possible effort to reduce environmental pollution.</p> <p>Based on research and various surveys, it has been estimated that air pollution is posing serious health problems for people worldwide, but it affects those in low- and middle-income countries the most. In fact, death rates due to air pollution have surged drastically in recent years. Owing to this concern, WHO has imposed strict air quality norms for countries like India, Bangladesh, Qatar, Indonesia, Afghanistan, and Mongolia, to name a few.</p> <p>While most of us are aware of the preventative measures that we can take, we also must enlighten those who are ignorant. People must be familiarized with the fatal repercussions of pollution to make them realize the gravity of the situation. Besides, these measures can start right from your home. So, if you wish to create a sustainable future for your kids and the younger generation, don’t delay and take action right now!</p>
<p>Outcome:</p>	<p>The students are given awareness on zero-waste systems and employed intensive recycling of nutrients, creative reuse of materials, and thoughtful management of resources.</p>

World AIDS Day: Poster Presentation Competition

The department of Bio-Chemistry conducted a poster presentation program in connection with the observance of 'World AIDS Day' on the 31st December, 2021 with the aim of increasing awareness about HIV and AIDS.

The participants presented posters on the themes –

1. Ending the HIV Epidemic
2. Structure of HIV
3. Signs & symptoms of AIDS
4. Transmission of HIV
5. Prevention of HIV & AIDS
6. A Portrait on Life struggles of a girl with HIV

30 Students from Guntur and Krishna Districts participated in the competition and the best posters were given prizes.

Quiz competition and rally on “World AIDS Day”

The department of Microbiology conducted College level Quiz competition for all B.A, B.Sc. and B.Com students. 15 groups, each group having 4 members, participated in the quiz.

Students participated with enthusiasm and interest. The audience also gave answers to some of the questions. They noted the facts and figures related to HIV and AIDS. Prizes were announced to the winners.

In this connection, an awareness rally was organized by the department in which around and other sexually transmitted diseases.

100 students participated. The students carried placards and slogans related to HIV

Activity : Poster Competition on “WORLD AIDS DAY”

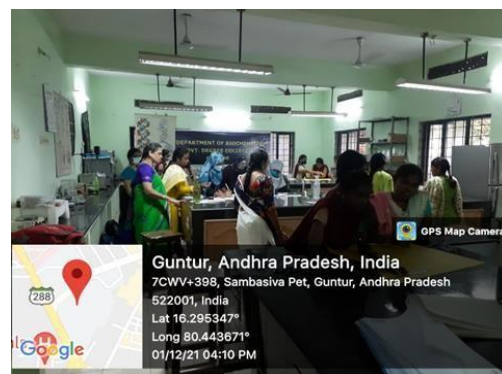

Date & Time : 1st Dec 2021, Wednesday

Batch of Students : Faculty of Guntur & Krishna Districts

Total no : 30 students

Objective Description : To create awareness on HIV & AIDS
: **Poster competitions were held by our Dept- Dept. of Biochemistry on 1st Dec 2021 in the department. Around 30 students participated in the competitions and presented on the following themes.**
Themes for Poster Presentation :

1. Ending the HIV Epidemic
2. Structure of HIV
3. Signs & symptoms of AIDS
4. Transmission of HIV
5. Prevention of HIV & AIDS
6. A Portrait on Life struggles of a Girl with HIV

Outcome : Students could able to express their views on the structure of AIDS virus, and presented posters.

Dept. of Zoology

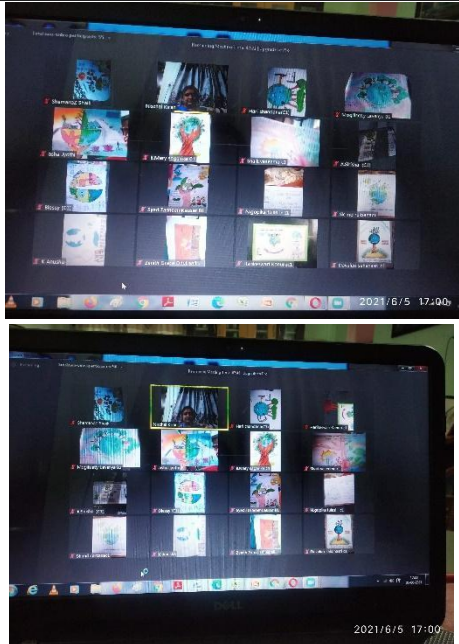

Name of the Activity	Celebration of Darwin's Day
Objective	To highlight Darwin's work and to celebrate science
Date	12.02.2022
Time	11.00am to 12.00pm
Participants	Students and faculty
No.of students	15
No.of faculty	2
Other participants	Nil
Description in brief	To commemorate the birth anniversary of Charles Darwin, Darwin Day is celebrated. In connection to this elocution competition was conducted on the topic " Importance of DarwinDay". The students participated actively and shared their views on the topic.
Outcome:	The students were able to know the importance of Darwin Day They got knowledge about the various significant contributions in the field of science and humanity

They were able know about the Darwin finch birds
They got knowledge about the Survival of the fittest

Department of Botany

Objective:	WORLD ENVIRONMENTAL DAY To create Environmental consciousness among students
Date :	05-06-2021 https://photos.app.goo.gl/HEZK7VcaAFRTrRQB9
Time :	4.00-5.00pm
Participants:	Students and faculty of Botany and Plant Nursery students

No.of faculty	3
Other participants	2

<p>Description in brief:</p>	<p>On the occasion of World environmental Day Poster making competition was conducted by the Department of Botany in onlinemode.About 25 Posters have been received from the students. Faculty of the Department highlighted the theme of the world Environmental Day. Prize winners of the event are honored.</p>
<p>Outcome:</p>	<p>The students are given inspiring inputs to improve the quality of life without compromising that of future generations. The initiatives to build a strong, broad-based global movement to ramp up restoration and put the world on track for a sustainable future are being brought to the notice of students, which include building political momentum for restoration as well as many of initiatives on the ground.</p>
<p>Evidence:</p>	

Poster Presentation on the occasion of National Science Day

Date: 01-03-2021

Objective:

- **To improve the presentation skills of students.**
- **To aware the students on emerging technologies in Computer Science field**

Need:

- **A poster presentation is a way to communicate the research or understanding of a topic in a short and concise format. All the Students need to improve their presentation skills and they need to update their knowledge of latest trends in Science and technology field In India.**

Target Audience: All Computer Science Students

Date and time: 01-03-2021

No. of students participated: 20

No. of Staff Attended: 07

Activity Report:

National Science Day is celebrated every year on February 28. This day recalls the notable invention "Raman Effect" by India's greatest scientist C V Raman. He was awarded the Nobel Prize for this discovery.

On this occasion Department of Computer Science organized a poster presentation for all the Computer Science Students on 01st March 2021. Total 20 students participated in this program and they have prepared Posters on various emerging technologies in computer science field and presented them. All computer science students and faculty have attended this program.

Outcome:

Poster presentations allow the author to meet and speak informally with interested viewers, facilitating a greater exchange of ideas and networking opportunities. The Presentation skills are improved in students. As well as the knowledge of trending technologies acquired

Evidences/Photos:

The Students are presenting their posters to computer Science students and faculty members

Essay Writing and Elocution Competition

Date: 08-03-2021

Objective:

- **To improve the writing skills and speaking skills of Students**

Need:

- **Students need to improve the writing skills and speaking skills as well as they need to know how to face the challenges as woman and they need to improve their courage to challenge this technical world.**

Target Audience:

- **All Computer Science students**

Date and time: 08-03-2021

No. of students participated: 6

No. of Staff Attended: 06

Activity Report:

International Women's Day is a global holiday celebrated annually on March 8 to commemorate the cultural, political, and socioeconomic achievements of women. It is also a focal point in the women's rights movement, bringing attention to issues such as gender equality, reproductive rights, and violence against women.

On this occasion the Department of Computer Science organized Essay Writing competition and elocution on the theme "Choose to Challenge" for all the Computer Science students on 8th March 2021.

Outcome:

Students have improved their speaking skills and Writing skills by participating in this competition.

Evidences/Photos:

The Students participated in Essay Writing

Students participated in Elocution

Students speaking about the challenges of Women

Online quiz on "Yoga"

Date: 21-06-2021

Objective:

- **To test knowledge of students and Faculty on “Yoga” and its importance in leading healthy life.**

Need:

- **Yoga is an ancient physical, mental and spiritual practice that gives calmness, peace, confidence, and courage to the people through which they can do several activities in a better way. At every level of existence, it is a state of harmony. Yoga is practiced in various forms around the world..**

Target Audience:

- **All Students and Faculty**

Date and time: 21-06-2021

No. of students participated: 159

Activity Report:

The art of practicing yoga helps in controlling an individual’s mind, body and soul. It brings together physical and mental disciplines to achieve a peaceful body and mind. The International Day of Yoga has been celebrated annually on 21 June since 2015.

On this occasion Department of Computer Science organized a State level Quiz on the topic “yoga” for the Faculty and all 1st, 2nd& 3rd year students on 21st June. This event is conducted in online mode. Total 159 Students and Faculty members participated in this Quiz. E-Certificates issued to the all the participants who secured 60% and above score received.

Outcome:

Students and Faculty have tested their knowledge on Yoga and also they got awareness on some facts about Yoga and its Importance to lead a Healthy life.

Sample Certificate:

Dept. of Computer Science

Online quiz on "Digital Literacy"

Date: 02-12-2021

Objective:

- To test basic Digital knowledge of students and to create awareness on importance of Digital Literacy

Need:

- According to UNESCO, 773 million young adults all over the globe lack literacy skills today. ILD 2021 is an initiative that spreads awareness among the youth to be literate and curb the literacy divide. Also, literacy is a key component of the United Nations Sustainable Development Goals (SDGs) and the UN's 2030 Agenda for Sustainable Development..

Target Audience:

- All Students

Date and time: 02-12-2021

No. of students participated: 216

Activity Report:

World Computer Literacy Day is observed on December 2, every year, to raise awareness about the role of computers in our lives and enhance digital literacy in all communities across the world

On this occasion Department of Computer Science organized a State level Quiz on the topic "Digital Literacy" for all 1st, 2nd & 3rd year students on 2nd December. This event is conducted in online mode. Total 216 Students participated in this Quiz. E-Certificates issued to the all the participants who secured 60% and above score received.

Outcome:

Students have tested their knowledge on basic Digital Literacy and also they got awareness on some facts about Computer basics.

Sample Certificate:

KLQQJC-CE000090

DEPARTMENT OF POLITICAL SCIENCE

Introduction

India is the biggest democratic country in the world. The success of a democracy depends on free and fair elections. The constitution provided universal adult franchise without any discrimination for citizens who attained the age of 18 years. The National Voters' Day is celebrated since January 2011 commemorating the formation of Election Commission on January 25th 1950.

On this eve, the students who are 18+ have enrolled their names as the new voters. At 11:00am students gathered at Lady Hope and pledge was conducted. The principal and Head of the Department Political Science addressed the students. **'Today's students are tomorrow's voters, so you should use your right to vote wisely without any fear and favor to uphold democratic values'**, said the Principal.

Objectives of the Programme

1. To create awareness among the students about Voter's Day.
2. To enlighten students about right to vote which is the important right.
3. To create awareness on democratic values.
4. Explained the value of vote for the success of democracy for the students.

Date : 25-01-2022

Time: 11 am to 11:30 am pledge was conducted at lady hope

11:30am- 01:30pm procession was conducted.

No. of Faculty Attended: 20

No. of Students Attended: 110

Outcomes:

1. Students have actively participated and shared their opinions and experiences about Voter's Day
2. Student have expressed that it will be useful for understanding in-depth.

DEPARTMENT OF POLITICAL SCIENCE

Introduction

Constitution Day also known as 'Samvidhan Divas', is celebrated in our country on 26th November every year to commemorate the adoption of the Constitution of India. On 26th November 1949, the Constituent Assembly of India adopted the Constitution of India, which came into effect from 26th January 1950. The Dept of Political Science celebrates this day every year to bring awareness among students about the same. This year it is celebrated as part of Azadi ka Amrit Mahotsav.

Objectives of the Programme

8. To create awareness about the History of Indian Constitution.
9. To enlighten students on debates that took place in Constituent Assembly to finalize the draft Constitution.

Date : 26-11-2021

Time: 10:30 am to 1:00 pm in Assembly Hall

No. of Faculty Attended: 11

No. of Students Attended: 100

Outcomes:

5. Students have actively participated in the programme.
6. Students and staff read the pledge on the Constitution Day.

Description

The department of Political Science organized the Programme. Ms. Curie invited the guests on to the dias. Dr. Nirmala, Principle of Incharge presided the meeting and gave opening remarks. She stated that students should cherish and adhere to the ideals of Constitution. Everyone should have minimum knowledge regarding the Constitution because it is the Law of the Land. Shri. Lalita Babu, narrated the history of the making of Indian Constitution. Shri. Rafi HoD of Dept of History, Dr. Koteswara Rao, HoD of Economics Dept explained the role of students in upholding the values of the Constitution. Dr. Anuradha, Dr. Mallikarjun and Dr. Ajay Kumar spoke on this occasion. Ms. Curie also spoke about the importance of Constitution which is called the living Constitution.

Essay writing and elocution competitions were conducted and prizes were given away to winners.

DEPARTMENT OF POLITICAL SCIENCE

Introduction

The United Nations General Assembly in 1948 adopted the Universal Declaration of Human Rights. This day is celebrated to raise awareness about people's social, cultural and physical rights and to ensure the welfare of everyone.

The United Nations on this day encourages nations to create equal opportunities for everyone and address the issues of inequality, exclusion and discrimination. To impart knowledge about the importance of Human Rights, the Department of Political Science in collaboration with Department of Sociology has celebrated the Human Rights Day 10th December 2021 in this College. On this Occasion, the Department has organized Essay Writing and Poster Presentation competition and prizes were given away. This year's Human Rights Day theme is "Equality, Reducing inequalities, advancing human rights."

Objectives of the Programme

- 10. To create awareness about the History of Human Rights.**
- 11. To enlighten students on human rights which are the basic human rights.**

Date : 10-12-2021

Time: 11 am to 1:30 pm in Assembly Hall

No. of Faculty Attended: 11

No. of Students Attended: 70

Outcomes:

- 7. Students have actively participated and shared their opinions and experiences about Human Rights and Constitution**
- 8. Student have expressed that it will be useful for understanding in-depth.**

Description

Retired Prof A. Subramanyam, Professor of Law in Acharya Nagarjuna University and Dr. B. Krishnaiah, Retired Principal were the Chief Guests. Prof Subramanyam speaking on the occasion stated that observing Human Rights must begin at home. Dr. Krishnaiah emphasized on the need to have knowledge on human rights especially Rights of Women. The Programme was presided over by the Principal of the College. Shri B. Lalita Babu, HoD Political Science gave a historical review on the evolution of Human Rights, Dr. V. Naveen Kumar, Dept.of Sociology HoD speaking on the occasion reminded the goals of sustainable development on gender equality. One of the students of II BA Ms. Zaveria spoke on the violation of human rights in India. Welcoming of Guests and Vote of Thanks was given by B. Curie, Lecturer in Political Science with concluding remarks including the status of India being one of the most unequal countries in the world as per a report by Oxfam. On this occasion competitions were conducted for students in essay writing and poster presentation. Prizes were given away to winners.

Department of Sociology

Guest Lecture on “Physical and Mental Health of Women” on the occasion of Women’s Day

Circular:

Date: 08-03-2021

We have celebrated International Women’s Day in the Department of Sociology, Govt. College for Women (A), Guntur on 8th March 2021. The theme for this year International Women’s Day is “Chose to Challenge”.

Introduction:

International Women's Day is a day where women are recognized for their outstanding achievements despite divisions and persisting boundaries. The achievements of women in various fields are discussed. The world is moving to words gender equality, it is moving towards balance between both men and women. Department Lecturer Dr.V.Naveen Kumar has briefed about the importance of women in the society.

Objective:

- 1. The programme is organized to promote peace with women rights**
- 2. To raise awareness on development of professional skills**
- 3. Achieve gender equality and empower all women and girls**

No. of Students Present: 30

No. of Faculty Present: 02

Resource Person: Dr.Shaheda Akthar, HOD, Computer Science, GCW(A), Guntur

Out Comes: The students found this lecture very much useful and the feedback from them was taken.

1. The Importance of Education and different skills be it in professional life and personal life has been discussed with the students.
2. On this day we acknowledge worth, significance and tremendous contribute of women to the society.

Activity Report: As a part of programme Department of Sociology students have distributed Sweets and Flowers to all our women staff on this occasion in our collage and organized a guest lecture on “Physical and Mental Health of Women” by Dr.Shaheda Akthar, HOD, Computer Science, GCW (A), Guntur for all SHT students on 08 March, 2021. Dr.V.Naveen Kumar, Lecturer in Sociology, welcomed the resource person who addressed the students about physical and mental health of women. She also explained the necessity to bring change in the world and treat women as equals.

Dr.Shaheda Akthar, detailed about the life of women and their importance in the society. She explained the importance of Education to Girls/Women, necessity of Physical and Mental strength among women in Society and the need for Skill based and Technical courses for achieving a good career. She also encouraged the students to be self confident and and independent.

DEPARTMENT OF SOCIOLOGY
(10-12-2021)

Introduction

The United Nations General Assembly in 1948 adopted the Universal Declaration of Human Rights. This day is celebrated to raise awareness about people's social, cultural and physical rights and to ensure the welfare of everyone. The United Nations on this day encourages nations to create equal opportunities for everyone and address the issues of inequality, exclusion and discrimination. To impart knowledge about the importance of Human Rights, the Department of Political Science in collaboration with Department of Sociology has celebrated the Human Rights Day 1st December 2021 in this College. On this Occasion, the Department has organized Essay Writing and Poster Presentation competition and prizes were given away. This year Human Rights Day theme is "Equality, Reducing inequalities, advancing Human Rights."

Objectives:

1. To create awareness about the History of Human Rights.
2. To enlighten students on human rights which are the basic human rights.

Date: 10-12-2021

Time: 11 am to 1:30 pm in Assembly Hall
